

CC Cleaning and Care Instructions

Tajima

Flooring types: *Denim*

1. Preventive Measures

A large proportion of the dirt usually carried into buildings can be avoided by fitting dirt catchment grids at the entrances to buildings and special dirt-absorbent flooring in entrance areas and by incorporating these into routine cleaning procedures

2. Cleaning of Newly Laid Flooring

The newly laid flooring must be thoroughly cleaned prior to use in order to remove all production residues and building dirt. *CC PU Cleaner* diluted in a ratio of 1:10 with water is used for this purpose. Where the levels of building dirt are low, the concentration can be reduced according to the degree of soiling. The cleaning solution is distributed over the floor and allowed to stand for approx. 5 minutes before the floor is scrubbed. The dirt is taken up using a *CC Spray Extractor* appliance with hard floor adapter or the *CC Premium F 2*. The floor covering is then neutralised with clean water until all traces of cleaning agent have been completely removed.

3. Routine Cleaning and Care

- 3.1 *Removal of dust:* Loose dust and dirt are removed by wiping over the floor using a slightly damp wiper mop or impregnated bonded fibre cloths.
- 3.2 *Manual wet cleaning:* For the removal of stubborn dirt, *CC PU Cleaner* is diluted in a ratio of 1:200 and the floor is either wiped over using this solution or cleaned using a cleaning appliance (e.g., the *CC Premium F 2*).
- 3.3 *Intermediate cleaning:* If it is no longer possible to remove stubborn soiling by wet wiping the floor manually during routine cleaning operations, an intermediate treatment using *CC PU Cleaner* diluted with water in a ratio appropriate to the degree of soiling (e.g., between 1:50 and 1:100) is to be recommended. The floor is cleaned using a scrubber or cleaning appliance (e.g., the *CC Premium F 2*).

4. Removal of Stains and Rubber Heel Marks

Stubborn stains and rubber heel marks can be removed using undiluted *CC PU Cleaner* together with a cloth or non-abrasive white pad. Remove stains immediately if possible since certain types of stains settle into the flooring as they age and can then only be removed with difficulty or are impossible to remove completely.
